NOT to be exceeded by ANY other run during the week! Every other run should be LESS than the long run 3) MAKING UP MILEAGE - DO NOT attempt to make up mileage under any circumstances. This will only get you injured. If you miss a run for whatever reason just do it the next day. 4) SUMMER TRAINING PACES - All mileage is assumed to be easy/conversational pace unless otherwise specified 5) WARMUPS + STRENGTH - It is assumed that dynamic warmups + drills are done before each run and strength/core work is done following every run 6) RUNNING SURFACES - All runs should be done on soft surfaces as much as possible 7) RUNNING TIME OF DAY - All runs should be completed either before 10:00am, or after 6:00pm to avoid the hottest parts of the day 8) RECOVERY BETWEEN SESSIONS - Ideally 8-12+ hours of recovery should be done between all runs/training sessions 9) GENERAL RUNNING SAFETY - Run with partners as much as possible, use sunscreen, bug spray, bright clothing, & always run FACING traffic
